Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example: 3620 (optional)

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

Abstract (Basic):

... A platform **rule** module recommends formatting method for
extracted data based on the characteristic of the end user...

...one of web TV (22), pager (21), cell phone (20), PNA (19), PC (18). The
access privilege rule module **authorizes access** to CPR **data** and
patient based on personal **data** including characteristic of role of
the user in the institution, role of user with respect...

...The **access control** module ensures secrecy of **reports**, especially
when concerned **patient** is a very important persons. Any legitimate
user can **access** and understand the report, because output is
formatted corresponding to the end user by the platform **rule** module.
The **rule** modules are stored as subset and downloaded corresponding to
the requirement of the institution which eliminates one bulky
cumbersome **rule** module...

...Abstract (Basic): The system includes first and second caregiver's

terminal to allow a first and second caregiver to access the patient record system. A patient record database has patient data and is coupled to said first and second caregivers terminals. The patient record database selectively provides access to the patient data from one of the first and second caregiver's terminals responsive to a predetermined set of access rules .

ABSTRACT

... system while paying attention to privacy by controlling access to data according to a privacy parameter .

SOLUTION: A safety data warehouse 102 includes a suite of privacy meta-data data view...

...application 110 and a third party application 112 are only accessible to data that are allowed by the given database view . A client can access , control and manage data collected from the client by using a client interface module 122 communicating with the view 108 and it is accomplished by using a communication medium 140.

... system. The permissions manager 1206 checks a user permissions file 1207 to determine which database **records** the **client** user is **authorized to access**, and then generates and transmits information to update a **parameters** screen 1208 displayed on the client screen through the **client** user interface to reflect those **authorized permissions** so that only tables, columns and **records** accessible to the **client** user are **displayed** for the user's selection. Preferably, transmission of the information to update the **parameters** screen 1208 is performed over a secure connection between the server and client computers. The...

ABSTRACT:

...a comprehensive e-commerce solution with a "human touch, permits a firm to maximize its **Web** presence while simultaneously giving individualized service for any number of clients. Through its tracking and profiling capabilities, M>WebTouch **permits** one's **client** service reps to offer a personalized response to the **virtual** clients, through e-mail or real-time chat, and there are plans to include VoIP...

...over IP as these become more functional for average users. Based upon in-house business **rules**, M>WebTouch monitors and **records** specific **clients** ' **browsing** habits on one's **Web** site and then provides this data to the service reps if the potential client requires personal attention. Moreover, M>WebTouch **permits** for proactive **client** contact. It uses cookies to capture information regarding a **Web** site hit, so that user can always choose to remain anonymous while on one's site. Regardless, a product like M>WebTouch is able to support the development of **Web** -based retail without resulting in a cold, impersonal site.
